Structures and Functions

- I. Scientists have to rely in common vocabulary and definitions to communicate with other scientists and share ideas with the public. Therefore, it is important that you prepare for the dissection experience by having a basic understanding of certain words.

Use a reliable source of information and define the following scientific words:

1. Bilateral symmetry

2. Omnivores

3. Molt

4. Invertebrates

5. Camouflage

6. Exoskeleton

II. Complete the table below as you work with the teacher.

	Structure	Description	Function
Crayfish's External Structures	Eyes		
	Chelipeds		
	Carapase		
	Antennae		
	Antennules		
	Mouth		
	Swimmerets		

Crayfish's Internal Structures	Gills		
	Heart		
	Stomach		
	Intestine		
	Anus		
	Digestive Glands		
	Encephalon
