If you like these mats and want others to use them as well please direct them to www.chillaxscience.com

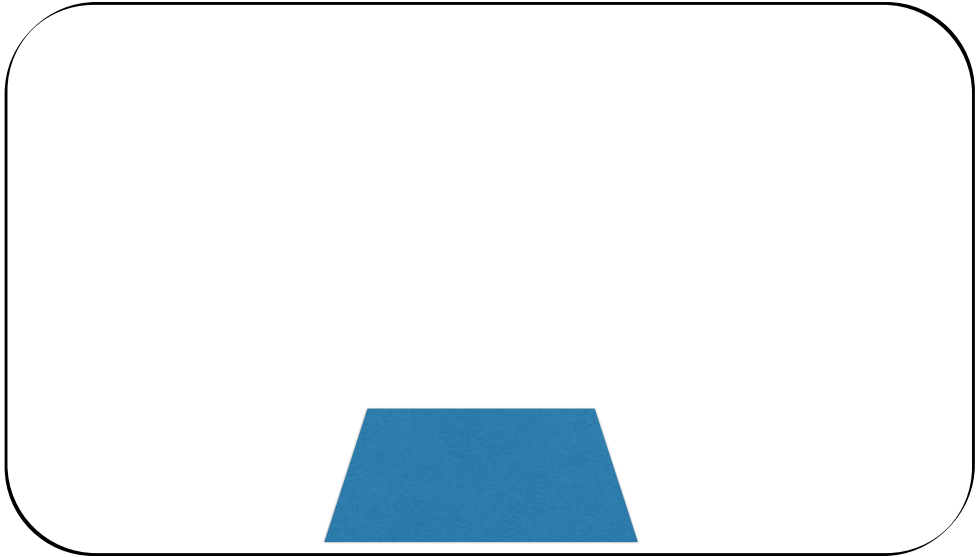

Instructions

These play dough mats can serve as an invitation for children to construct a playdough model of plants that they are observing.

Suggestion on how to set up:

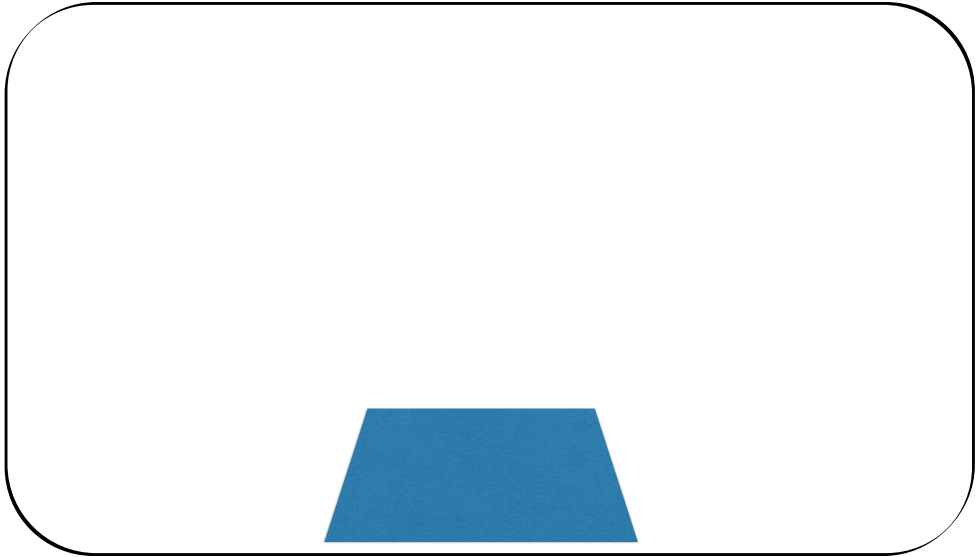

- Print the mats
- Laminate the mats. This will allow children to reuse mats multiple times.
- Provide children playdough, the mat, and the suggested plant.
- Invite children to create the model using the play dough.
- Encourage the child to verbally describe their play dough model.
